

# International Service Availability & Restrictions

Services from Watson Core Limited

Effective Date: January 2, 2026

To ensure transparency and compliance with applicable laws, this document outlines our global service availability, including regions where we offer full, limited, very limited, or no services.

## Important Notice

We can provide **full services to clients worldwide**, except in countries explicitly prohibited under **UK sanctions law** (see Section 2).

All other service limitations arise solely from **local regulations** in the client's jurisdiction—particularly those concerning data privacy, telecommunications, or restrictions on foreign technical assistance.

Where local laws impose such constraints, we may still offer support upon request. However, **legal and regulatory responsibility remains with the client**. These limitations protect the client's compliance obligations, not ours.

## 1 Reseller and Dealer Network

If an authorized reseller or dealer operates in your country, we will refer you to that local partner for service and support.

### Examples:

- Clients in North America may be referred to partners in Canada.
- Clients in Mexico may be referred to regional partners.

If no local partner exists, we will make every reasonable effort to provide services directly—subject to UK legal requirements and the client's local regulations.

## 2 Countries with Full Prohibition (No Services Available)

Under UK and international sanctions, we are legally **prohibited** from providing any services to the following countries or territories:

**Afghanistan (Taliban identities only), Belarus, Crimea, Donetsk, Luhansk, Iran, North Korea, Russia**

All communications, service requests, or transactions originating from these jurisdictions will be declined.
